VB100 TEST REPORT

C-Prot

C-Prot Endpoint Security

May 21, 2024

Test result
Test passed

Detection grade
Grade A+

Certification
99.76% malware detected

Clean
0.002% false alarms

Quick Summary

Product version

1.0.0.498

Test period:

May 2, 2024 - May 3, 2024

Test methodology

VB100 1.5 [Link](#)

Test platform

Microsoft Windows 10 Pro N, 64-bit, 10.0.19044

Executive summary

We tested **C-Prot Endpoint Security** (version 1.0.0.498) between May 2, 2024 and May 3, 2024, on Microsoft Windows 10 Pro N, 64-bit, 10.0.19044, as per the 1.5 version of the VB100 methodology.

The tested product has successfully met the VB100 test criteria, with a malware detection grade of A+.

Test criteria:

- The product must detect at least 75.00% of all test cases in the Certification set (malicious samples).
- The product must not generate more than 0.05% false alarms in the Clean set (legitimate program samples).

Where to find more details

AMTSO Standard Compliance

Virus Bulletin executed this test in accordance with the AMTSO Standard of the Anti-Malware Testing Standards Organization. The compliance status can be verified on the [AMTSO website](#).

Test sets and product response

The VB100 test uses multiple sets of malicious and clean test cases to verify the ability of the tested product to detect malware, and to do so without generating false alarms for legitimate programs.

AT A GLANCE

CERTIFICATION	CLEAN
<p>Description</p> <p>Common and prevalent Windows malware recently observed in the the wild.</p>	<p>Description</p> <p>A random selection of some widely and less widely used legitimate program files.</p>
