VB100 TEST REPORT

Alibaba Cloud

Alibaba Cloud Security Center

January 26, 2026

Test result
Test passed

Detection grade
Grade A+

Certification
99.61% malware detected

Clean
0.006% false alarms

Quick Summary

Product version

1.1.2

Test date:

January 5, 2026

Test methodology

VB100 1.7 [Link](#)

Test platform

Microsoft Windows 11 Pro, 64-bit, 10.0.26200

Executive summary

We tested **Alibaba Cloud Security Center** (version 1.1.2) on January 5, 2026, on Microsoft Windows 11 Pro, 64-bit, 10.0.26200, as per the 1.7 version of the VB100 methodology.

The tested product has successfully met the VB100 test criteria, with a malware detection grade of A+.

Test criteria:

- The product must detect at least 75.00% of all test cases in the Certification set (malicious samples).
- The product must not generate more than 0.05% false alarms in the Clean set (legitimate program samples).

Where to find more details

AMTSO Standard Compliance

Virus Bulletin executed this test in accordance with the AMTSO Standard of the Anti-Malware Testing Standards Organization. The compliance status can be verified on the [AMTSO website](#).

Test sets and product response

The VB100 test uses multiple sets of malicious and clean test cases to verify the ability of the tested product to detect malware, and to do so without generating false alarms for legitimate programs.

AT A GLANCE

CERTIFICATION	CLEAN
Description	Description
Common and prevalent Windows malware recently observed in the the wild.	A random selection of some widely and less widely used legitimate program files.
Type	Type
	
Outcome	Outcome
Pass 	Pass 
Detection rate	False alarm rate
99.61%	0.006%
Best possible outcome: 100.00% Requirement: >= 75.00%	Best possible outcome: 0.00% Requirement: <= 0.05%

DETAILED TEST RESULTS

Total cases tested	Total cases tested
1,786	99,998
Cases detected	Cases with false alarm
1,779	6
Cases missed	Cases without false alarm
7	99,992

TEST SET COMPOSITION

Windows PE executables	Windows PE executables
1,786	29,516
Other file types	Other file types
0	70,482

Report notes

Report notes contain complementary information that may be of interest to the report reader. Likewise, any extraordinary circumstance—particularly, those that may affect the test results—are recorded in these notes.

1

The tested product was a Software Development Kit (SDK) rather than a full-fledged traditional endpoint security solution. Detection and remediation were performed by executing a Python scrip that interacted with the SDK, which is functionally equivalent to the on-demand scanning in the VB100 methodology
